

# **Fintech Group Project 01**

**Azuki, BAYC and Crypto Punks NFTs.**

by Github users /[@dockingbay24](#) /[@angel-estrada7](#) and /[@mmsaki](#), 2022.

# Table of Contents

- Hypothesis of Project
- Data Collection
- Data Cleanup & Exploration
- Data Analysis
- Discussion
- Postmortem
- Your Questions?

**Azuki Token ID: 7558 | Current Owner: ron1n.eth | Sale: 27ETH**

## everyone else

So what happens if  
somebody registers  
somebody elses art on  
Deloitte?

So what stops me  
from doing this, and  
saying mine now!

You cannot  
unsteal that  
art that was  
put up  
without  
consent.

## The NFT Alpha

Monetizes memes

Money goes  
brrrrrrrrrrrrrr

Creates something  
for the community

# 1. Hypothesis

# Hypothesis of Project

*Our motivation and summary...*

- Should you invest in [Azuki](#), [BAYC](#) or [Crypto Punks](#)?
- How can you tell which collection is performing well?

# Data Collection

Describing what kinds of data we needed and where to find it.

# 2. Data Collection

Collecting data for NFT Collections

- Covalent API
- Etherscan Python Dependacy

# 3. Data Cleanup & Exploration

Exploring our collection data through APIs preparing it for analysis

# 4. Data Analysis

Analyzing our data and developing figures to answer our questions

# 5. Discussion

Combining our data and discussing our findings

# Postmortem

*Did we find everything we expected to find?*

- Our difficulties and how we dealt with them
- Additional questions that came up that we didn't answer
- What would we research next if we had more time?

# 8. Questions

Open floor Q&A with the audience

thank you,
